Professional Experience

May 2026 – Present

Boston Red Sox, Boston, MA – *Associate, Baseball Sciences*

- Answer ad hoc research requests from coaches and player development staff, delivering Quarto reports with clear visual takeaways on pitcher development, technology benchmarking, and biomechanics trends
- Took sole ownership of the low-latency biomechanics project after graduation, rebuilding core components into its first fully functional end-to-end version, with sub-40-second feedback
- Built an automated pitcher advance-scouting Python pipeline delivering on-demand PDF reports via Slack
- Redesigned three R/Shiny tools (command tracking, biomechanics, hitting) as a TypeScript/Angular widget suite

March 2025 – August 2025

Boston Red Sox, Fort Myers, FL – *Associate, Baseball Sciences*

- Developed comprehensive educational materials including biomechanics metric explainers and normative value documentation to translate complex data analytics into actionable coaching insights
- Enhanced player development infrastructure by improving and maintaining internal tools including pitching and hitting biomechanics data visualization dashboards, and time series analysis tools
- Created a machine learning classification model using Gaussian Mixture Models to categorize pitcher delivery types (stretch vs windup vs leg lift) from KinaTrax biomechanics data

August 2024 – December 2024

Driveline Baseball Enterprises, Kent, WA – *Hitting Trainer Intern*

- Conducted comprehensive athlete assessments and developed individualized training programs for 15 hitters ranging in experience level from youth to professional
- Tailored individual hour-long training sessions for 17 Driveline Youth Academy athletes to address hitter-specific swing flaws and guide athletes to develop intentional training habits in challenging environments
- Leveraged programming skills and advanced sabermetrics from TruMedia, Statcast, and Driveline internal tools for baseball operations tasks including swing metric visualizations, MiLB development analysis, and content creation

Coaching & Leadership

The BASE, Roxbury, MA – *Volunteer Coach* *May 2026 – Present*

- Coach summer skill-development workouts and high school fall ball at a youth baseball and education nonprofit

Northeastern Club Baseball, Boston, MA – *Captain & Director of Player Development* *2022 – 2026*

- Led team player-development strategy and implemented game-like training environments with Blast and HitTrax

Education

Northeastern University, Boston, MA *2021 – 2026*

Bachelor of Science in Mechanical Engineering, **Magna Cum Laude** | Minors: Physics, Mathematics | GPA: 3.77

Honors: Dean's List, Dean's Scholarship, University Grant

Projects

Low-Latency Biomechanics Feedback – *Senior Capstone Project* *September 2025 – April 2026*

- Proposed and led a hand-picked team through an 8-month, Red Sox-sponsored capstone project from concept to testing
- Designed a portable pitching biomechanics system (IMU sensors, custom compression sleeve) targeting sub-60-second feedback, with event detection triggering on 97% of test pitches
- Engineered the full software stack, including a supplemental streaming source, an ASCII command parser, a sensor calibration procedure, a PyQt desktop interface, and an iOS companion app

Intended Zones Tracker – *Boston Red Sox Project* *Summer 2025*

- Upgraded a pitcher command-training Shiny app with filtering, new visualizations, and automated reporting

Skills

Programming: *Python, R, SQL, JavaScript/TypeScript, MATLAB* | **Software:** *Excel, Quarto, R Shiny, Angular*

Baseball Tech: *TrackMan, KinaTrax, Hawk-Eye, Blast Motion, HitTrax, Rapsodo, Edgertronic video*

Languages: *English (native), Spanish (basic; actively learning)*
